LIST OF CONTENTS

NUMBER 1

J. W. Lee, C. J. Santana, C. R. Abernathy, S. J. Pearton and K. S. Jones: Plasma-induced damage and hydrogenation of $Al_xGa_{1-x}P$ 1

S. Cheon, S. C. Lee, S. Hong and K.-H. Yoo: Study of quasi-two dimensional hole gas in $Si/Si_xGe_{1-x}/Si$ quantum wells 7

Lih-Wen Laih, Wen-Shiung Lour, Jung-Hui Tsai, Wen-Chau Liu, Cheng-Zu Wu, Kong-Beng Thei and Rong-Chau Liu: Characteristics of metal-insulated-semiconductor (MIS) like $In_{0.2}Ga_{0.8}As/GaAs$ doped-channel structure 15

Tetsuzo Ueda, Kazuo Miyatsuji and Daisuke Ueda: Temperature-independent transconductance in 0.05 μm-gate AlGaAs/GaAs MODFET 21

Y. Yue, J. J. Liou, A. Ortiz-Conde and F. Garcia Sanchez: Effects of high-level free-carrier injection on the base transit time of bipolar junction transistors 27

M. Jagadesh Kumar and Savvas G. Chamberlain: Selective reactive ion etching of PECVD silicon nitride over amorphous silicon in CF_4/H_2 and nitrogen containing CF_4/H_2 plasma gas mixtures 33

M. Mébarki, H. Ait-Kaci, J. L. Lazzari, C. Segura-Fouillant, A. Joullié, C. Llinarès and I. Salesse: High sensitivity 2.5 μm photodiodes with metastable GaInAsSb absorbing layer 39

Serge Biesemans, Stefan Kubicek and Kristin De Meyer: New current-defined threshold voltage model from 2D potential distribution calculations in MOSFETs 43

J. P. Colinge, X. Baie, V. Bayot and E. Grivei: A silicon-on-insulator quantum wire .. 49

Melih Özaydin and Lester F. Eastman: Analysis of abrupt emitter–base heterojunctions by multi-flux method and self-consistent solution of Schrödinger and Poisson equations 53

W. Feiler, W. Gerlach and U. Wiese: On the turn-off behaviour of the NPT-IGBT under clamped inductive loads 59

G. F. Niu, G. Ruan and D. H. Zhang: Modeling of hole confinement gate voltage range for SiGe channel *p*-MOSFETs 69

Young-Shying Chen, Tz-Hua Tang and Sheng-Lyang Jang: Modeling of hot-carrier-stressed characteristics of *n*MOSFETs 75

Enise Ayyildiz, Abdulmecit Türüt, Hasan Efeoğlu, Sebahattin Tüzemen, Mustafa Sağlam and Y. Kemal Yoğurtçu: Effect of series resistance on the forward current–voltage characteristics of Schottky diodes in the presence of interfacial layer.. 83

S. P. Wainwright, S. Hall and D. Flandre: The effect of series resistance on threshold voltage measurement techniques for fully depleted SOI MOSFETs 89

Il-Jung Kim, Satoshi Matsumoto, Tatsuo Sakai and Toshiaki Yachi: Analytical approach to breakdown voltages in thin-film SOI power MOSFETS 95

RANBIR SINGH and B. J. BALIGA: Cryogenic operation of power bipolar transistors..... 101

SUNG-HUN OH, JULIAN J. SANCHEZ and THOMAS A. DEMASSA: Small geometry MOS threshold voltage variations from solutions of the three-dimensional Poisson's equation..... 109

M. D. J. BOWYER, D. G. ASHWORTH and R. OVEN: Representation of two-dimensional ion implantation rest distributions by Pearson distribution curves for silicon technology... 119

WENMU HE and ZEYNEP CELIK-BUTLER: $1/f$ noise and dark current components in HgCdTe MIS infrared detectors..... 127

M. M. JAHAN and A. F. M. ANWAR: An analytical expression for base transit time in an exponentially doped base bipolar transistor..... 133

J. M. GARRETT, M. J. EVANS and M. S. TOWERS: A comparative study of the transient response of GTO thyristors..... 137

RAJIV MADABHUSHI, CAN E. KORMAN and ISAAK D. MAYERGOYZ: A three-dimensional MOSFET solver implementing the fixed point iteration technique..... 147

N. R. MIRCHINA and A. PELED: Time of flight analysis of charge transport in insulators for the nondispersive trap limited domain..... 159

L. L. LIOU, B. BAYRAKTAROGLU and C. I. HUANG: Theoretical thermal runaway analysis of heterojunction bipolar transistors: junction temperature rise threshold..... 165

Notes

PINGXI MA, LICHUN ZHANG and YANGYUAN WANG: Analytical relations pertaining to collector current density and base transit time in bipolar transistors..... 173

Zs. J. HORVÁTH: Comment on "Analysis of I–V measurements on $CrSi_2$–Si Schottky structures in a wide temperature range"..... 176

NUMBER 2

Review Paper

K. G. MERKEL, C. L. A. CERNY, V. M. BRIGHT, F. L. SCHUERMEYER, T. P. MONAHAN, R. T. LAREAU, R. KASPI and A. K. RAI: Improved p-channel InAlAs/GaAsSb HIGFET using Ti/Pt/Au ohmic contacts to beryllium implanted GaAsSb..... 179

A. KAGER and J. J. LIOU: Two-dimensional numerical analysis of AlGaAs/GaAs heterojunction bipolar transistors including the effects of graded layer, setback layer and self-heating..... 193

K. L. TSAI, C. P. LEE, P. C. CHEN, J. S. TSANG, C. M. TSAI and J. C. FAN: The effect of barrier structure on the performance of double barrier quantum well infra-red photodetectors..... 201

YUO-HSIEN SHIAU and YI-CHEN CHENG: Static and dynamic hysteresis in deep-impurity doped n-GaAs under d.c. bias voltage..... 205

A. ORTIZ-CONDE, J. J. LIOU, R. NARAYANAN and F. J. GARCÍA SÁNCHEZ: Determination of physical mechanisms contributing to the difference between drain and source resistances in short-channel MOSFETs..... 211

FRANK J. EFFENBERGER and GLENN D. BOREMAN: Dual-carrier transport model of SPRITE detectors 217

J. TARDY, P. ROJO-ROMÉO, P. VIKTOROVITCH, P. CRÉMILLIEU and X. LETARTRE: Stability and noise of Pd–Ge–Ag–Au ohmic contacts to InGaAs–InAlAs high electron mobility transistors 225

G. HINRICHS and D. PREIKSZAT: A new process for simultaneous fabrication of a buried and a surface oxide layer 231

E. CORBIN, K. B. WONG and M. JAROS: Auger-free Si–SiGe quantum well structures for infra-red detection at 10 μm 237

SERHAT ÖZDER, İSMAİL ATILGAN and BAYRAM KATIRCIOĞLU: Effects of surface potential fluctuations on DLTS of MOS structure 243

A. FAIGÓN and F. CAMPABADAL: A semi-empirical model for the tunnel current–voltage characteristics in Al–SiO_2–Si(p) structures 251

JIH-SHIN HO, TZUEN-HSI HUANG and MING-JER CHEN: High gain p–n–p gated lateral bipolar action in a fully depleted counter-type channel p-MOSFET structure 261

SYLVIE GALDIN, FRANÇOIS-XAVIER MUSALEM, PHILIPPE DOLLFUS, MIREILLE MOUIS and PATRICE HESTO: Transient analysis of CML inverter using Monte Carlo simulations ... 269

V. W. L. CHIN, J. W. V. STOREY and M. A. GREEN: Bias and thickness dependence of the infra-red PtSi/p-Si Schottky diode studied by internal photoemission 277

Z. ÇELIK-BUTLER, R. ZHANG and N. PATEL: 1/f noise and electromigration in multilayered via structures 281

M. A. ABDALA, M. A. IQBAL and B. K. JONES: The measurement and analysis of 1/f noise in GaAsFETs 287

MICHAIL F. KOKOREV and NICOLAI A. MALEEV: A new approach to the determination of gate length and other parameters of GaAs MESFETs and MODFETs 297

Notes

YU ZHU, YOSHITERU ISHIMARU and MASAFUMI SHIMIZU: Gate resistance determination for HEMTs with MIS-type Schottky contact 303

GUO-FU NIU and GANG RUAN: The effect of substrate bias in bulk and SOI SiGe-channel p-MOSFETs 305

S. C. CHOO: On space-charge recombination in pn junctions 308

C. R. ABERNATHY, S. J. PEARTON, J. D. MACKENZIE, J. R. MILEHAM, S. R. BHARATAN, V. KRISHNAMOORTHY, K. S. JONES, M. HAGEROTT-CRAWFORD, R. J. SHUL, S. P. KILCOYNE, J. M. ZAVADA, D. ZHANG and R. M. KOLBAS: Growth and fabrication of GaN–InGaN microdisk laser structures 311

C. DONOLATO: Analytical approximation to the capacitance of the microstrip disk capacitor 314

YUN YUE and JUIN J. LIOU: Effects of incomplete ionization of impurity dopants on the performance of bipolar junction transistors 318

Letter to the Editor

E. H. SHABAN: Non-exponential capacitance transient in deep level transient spectroscopy (DLTS) measurements 321

NUMBER 3

T. DRABE and R. SITTIG: Theoretical investigation of planar junction termination 323

A. SUBEKTI, V. W. L. CHIN and T. L. TANSLEY: Ohmic contacts to *n*-type and *p*-type GaSb 329

K. S. A. BUTCHER, T. L. TANSLEY and D. ALEXIEV: An instrumental solution to the phenomenon of negative capacitances in semiconductors 333

NAOTO MATSUO and AKIO SASAKI: Conduction mechanism of oxide–nitride–oxide film formed on the rough polycrystalline silicon surface 337

JUNG-HUI TSAI, WEN-SHIUNG LOUR, LIH-WEN LAIH, RONG-CHAU LIU and WEN-CHAU LIU: Characteristics of camel-gate structures with active doping channel profiles 343

MOTAHARUL KABIR MAZUMDER, KIYOTERU KOBAYASHI, YOJI MASHIKO and HIROSHI KOYAMA: Negative stress-induced current in oxidized nitride layers of different nitride thicknesses (< 5 nm) 349

S. BOTA, B. GARRIDO, J. R. MORANTE, A. BARABAN and P. P. KONOROV: Electroluminescence analysis of the structural damage created in SiO_2/Si systems by Ar ion implantation 355

CHIN-SHAN HOU and CHING-YUAN WU: A design strategy for short gate length SOI MESFETs 361

LICHYN LEE, HAROLD G. PARKS and RONALD D. SCHRIMPF: Interpretation of experimentally observed C–t responses for copper contaminated devices 369

JÜRGEN SCHNEIDER, ERIC KOENIG, UWE ERBEN, ULRICH SEILER and HERMANN SCHUMACHER: Thermionic diffusion model for abrupt HBTs including self-heating inside the multilayer nonplanar device structure 377

B. L. YANG, H. WONG and Y. C. CHENG: Modelling of trap-assisted electronic conduction in thin thermally nitrided oxide films 385

JURAJ RACKO, ALENA GRMANOVÁ and JURAJ BREZA: Extended thermionic emission–diffusion theory of charge transport through a Schottky diode 391

XIAOPING GAO and SINCLAIR S. YEE: Hole capture cross section and emission coefficient of defect centers related to high-field-induced positive charges in SiO_2 layers 399

SHI-HO KIM, KYEONG-SIK MIN and KWYRO LEE: Time dependent hot-carrier induced interface state generation in deep submicron LDD *n*MOSFETs 405

KOUBAO DING and XIUMIAO ZHANG: A new method for MIS/IL silicon solar cell simulation 411

Notes

J. J. LIOU, S. H. SHEU, C. I. HUANG and D. C. WILLIAMSON: Bias and temperature dependencies of base and collector leakage currents of AlGaAs/GaAs heterojunction bipolar transistors 415

A. ORTIZ-CONDE, F. J. GARCIA SANCHEZ and J. J. LIOU: An improved method for extracting the difference between drain and source resistances in MOSFETs 419

NUMBER 4

Special Section: Low Power Electronics

Foreword 423

GERHARD SCHROM, CHRISTOPH PICHLER, THOMAS SIMLINGER and SIEGFRIED SELBERHERR: On the lower bounds of CMOS supply voltage 425

D. SCHERRER, P. APOSTOLAKIS, J. MIDDLETON, P. J. MARES, J. KRUSE and M. FENG: Noise and gain comparison of 0.25 μm gate MESFETs and *P*HEMTs for low power wireless communication circuits 431

HIROKI NAKAJIMA, KENJI KURISHIMA, SHOJI YAMAHATA, TAKASHI KOBAYASHI and YUTAKA MATSUOKA: Low-current operation of high-speed InP/InGaAs heterojunction bipolar transistors 439

NEAL KISTLER and JASON WOO: Scaling behavior of sub-micron MOSFETs on fully depleted SOI 445

D. FLANDRE, L. F. FERREIRA, P. G. A. JESPERS and J.-P. COLINGE: Modelling and application of fully depleted SOI MOSFETs for low voltage, low power analogue CMOS circuits 455

DAVID E. FULKERSON, STEVEN BAIER, JAMES NOHAVA and ROD HOCHHALTER: Complementary heterostructure FET technology for low power, high speed digital applications 461

D. BEHAMMER, J. N. ALBERS, U. KÖNIG, D. TEMMLER and D. KNOLL: Si/SiGe HBTs for application in low power ICs 471

P. K. VASUDEV: CMOS device and interconnect technology enhancements for low power/low voltage applications 481

P. K. VASUDEV, M. MENDICINO and T. E. SEIDEL: Advanced materials for low power electronics 489

MICHAEL ALLES and WADE KRULL: Advanced manufacturing of SIMOX for low power electronics 499

Papers

S. BELKOUCH, C. AKTIK, H. XU and E. L. AMEZIANE: GaAs surface chemical passivation by $(NH_4)_2S + Se$ and the effect of annealing treatments 507

KUNTAL JOARDAR: Substrate crosstalk in BiCMOS mixed mode integrated circuits 511

YI-ZEN HUANG, WEI-SHIN LU and JENN-GWO HWU: Process control of rapid thermal N_2O-annealed thin gate oxides 517

JUAN M. LÓPEZ-GONZÁLEZ and LLUIS PRAT: Numerical modelling of abrupt InP/InGaAs HBTs 523

D. FREUND, A. KLÖS and A. KOSTKA: Conformal mapping techniques for the analytical, two-dimensional calculation of currents in lateral bipolar transistor structures 529

JONGOH KIM, BYOUNGUK IHN, BUMMAN KIM, KWANGIL LEE, WONOH LEE and SEOUNGHWAN LEE: Extraction of lateral device parameters and channel doping profile of vertical double-diffused MOS transistors 541

M. F. ZYBURA, S. H. JONES, B. W. LIM, J. D. CROWLEY and J. E. CARLSTROM: 125–145 GHz stable depletion layer transferred electron oscillators 547

TOMÁS GONZÁLEZ and DANIEL PARDO: Physical models of ohmic contact for Monte Carlo device simulation 555

D. BAUZA and G. GHIBAUDO: Analytical study of the contribution of fast and slow oxide traps to the charge pumping current in MOS structures 563

YONG QIANG LI, C. ANDRE T. SALAMA, MIKE SEUFERT, PETER SCHVAN and MIKE KING: A resurfed high-voltage NMOS device fully compatible with a low-voltage 0.8 μm BiCMOS technology 571

K. CHAKRABARTY and S. N. SINGH: Depletion layer resistance and its effect on I–V characteristics of fully- and partially-illuminated silicon solar cells 577

P. G. MCCAFFERTY, A. SELLAI, P. DAWSON and H. ELABD: Barrier characteristics of PtSi/p-Si Schottky diodes as determined from I–V–T measurements 583

P. AUSTIN, J. L. SANCHEZ and R. BERRIANE: Optimization of PP^- junction termination for new power devices 593

D. HOARE, R. A. ABRAM and R. W. KELSALL: Monte Carlo simulation of real and reciprocal space transfer of electrons in a pseudomorphically strained $GaAs/In_{0.15}Ga_{0.85}As/GaAs$ quantum well 601

V. L. FALKO, S. I. KHANKINA and V. M. YAKOVENKO: Surface thermoplasma waves and their interaction with flow of charged particles at a semiconductor–metal interface 611

S. K. ISLAM and F. C. JAIN: Analysis of quantum wire high electron mobility transistor (HEMT) structure 615

NUMBER 5

H. X. YUAN and A. G. U. PERERA: Space charge analysis of Si n^+–i structures with application to far-infrared detectors 621

S. BABIKER, A. ASENOV, J. R. BARKER and S. P. BEAUMONT: Finite element Monte Carlo simulation of recess gate compound FFTs 629

M. ACEVES, C. FALCONY, A. REYNOSO-HERNANDEZ, W. CALLEJA and A. TORRES: The conduction properties of the silicon/off-stoichiometry-SiO_2 diode 637

H. C. LIN, H. Y. LIN and C. Y. CHANG: Effect of Ge incorporation on the performance of p-channel polycrystalline $Si_{1-x}Ge_x$ thin-film transistors 645

PETER J. PRICE: A finite number of sub-bands? 653

N. A. DUMIN, K. J. DICKERSON, D. J. DUMIN and B. T. MOORE: Correlation of the decay of tunneling currents with trap generation inside thin oxides 655

S. KRISHNAN and J. G. FOSSUM: Compact non-local modeling of impact ionization in SOI MOSFETs for optimal CMOS device/circuit design 661

SUMIO TANAKA: Study of Fowler–Nordheim tunneling current from polysilicon asperity surface into oxide based on accurate formulation utilizing the charge simulation method 669

Y. ONGANER, M. SAĞLAM, A. TÜRÜT, H. EFEOĞLU and S. TÜZEMEN: High barrier metallic polymer/p-type silicon Schottky diodes 677

S. S. ROFAIL and YEO KIAT SENG: New complementary BiCMOS digital gates for low-voltage environments 681

KUO-FENG YOU and CHING-YUAN WU: A novel two-step etching process for reducing plasma-induced oxide damage 689

F. REN, W. S. HOBSON, J. M. KUO, J. R. LOTHIAN, J. LOPATA, S. J. PEARTON and J. A. CABALLERO: Electron cyclotron resonance plasma etching of InP and related materials in BCl_3 695

K. CHEN, J. H. HUANG, J. Z. MA, Z. H. LIU, M. C. JENG, P. K. KO and C. HU: Temperature effects on MOSFET driving capability and voltage gain 699

A. M. P. J. HENDRIKS, W. MAGNUS and T. G. VAN DE ROER: Accurate modelling of the accumulation region of a double barrier resonant tunnelling diode 703

PING-CHANG YANG and PATRICK S. LIU: Modeling of anomalous current–voltage characteristics in floating body fully depleted SOI nMOSFETs 713

YUHUA CHENG and TOR A. FJELDLY: Unified physical I–V model of fully depleted SOI/MOSFETs for analog/digital circuit simulation 721

MELIH ÖZAYDIN and LESTER F. EASTMAN: Non-equilibrium carrier transport in the base of heterojunction bipolar transistors 731

NAOUFEL BEN ABDALLAH, PIERRE DEGOND and AHMED YAMNAHAKKI: The Child–Langmuir law as a model for electron transport in semiconductors 737

ARTI NOOR and CHANDRA SHEKHAR: A 3D analytical model for threshold voltage of small-geometry MOSFET 745

G. S. SAMUDRA, B. P. SEAH and C. H. LING: Determination of LDD MOSFET drain resistance from device simulation 753

Notes

A. K. PANDA, G. N. DASH and S. P. PATI: Computer aided optimization of ion implantation impurity profiles for n^+npp^+ double drift IMPATT diodes with three moment approach 759

F. REN, R. A. HAMM, R. G. WILSON, S. J. PEARTON and J. R. LOTHIAN: Passivation of carbon doping in InGaAs during ECR-CVD of SiN_x 763

Letter to the Editor
Comments on "Ehrenfest derivation of the mean forces acting in materials with nonuniform band structure: a canonical approach" 767

NUMBER 6

M. S. SHEKAR and B. J. BALIGA: Temperature dependence of the emitter switched thyristor characteristics 769

J. B. CASADY, J. D. CRESSLER, W. C. DILLARD, R. W. JOHNSON, A. K. AGARWAL and R. R. SIERGIEJ: Direct current characterization of depletion-mode 6H-SiC MOSFETs from 294 to 723 K 777

D. M. RICHEY, A. J. JOSEPH, J. D. CRESSLER and R. C. JAEGER: Evidence for non-equilibrium base transport in Si and SiGe bipolar transistors at cryogenic temperatures 785

CHENG-ZU WU, LIH-WEN LAIH and WEN-CHAU LIU: Study of InGaAs/GaAs metal-insulator-semiconductor-like heterostructure field-effect transistor 791
